DETAILED ACTION

This application is in condition for allowance except for the following formal matters:

Drawings

Figure 5 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

The abstract of the disclosure is objected to because on page 34, line 2, "comprises", and line 16, "means" should be avoided in the abstract.

Correction is required. See MPEP § 608.01(b).

Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

Claim Objections

Claims 1-8 are objected to because of the following informalities:

As to claim 1, line 17, "the distance" lacks antecedent basis.

As to claim 1, line 22, "the moving speed" lacks antecedent basis.

As to claim 1, line 24, "the surface resistivity" lacks antecedent basis.

As to claim 4, line 7, "the diameter" lacks antecedent basis.

As to claim 4, line 9, "the winding angle" lacks antecedent basis

As to claim 5, line 6, "the diameter" lacks antecedent basis

As to claim 5, line 8, "the winding angle" lacks antecedent basis.

As to claim 6, line 17, "the distance" lacks antecedent basis.

As to claim 6, line 21, "the primary transfer means" lacks antecedent basis.

As to claim 6, line 22, "the moving speed" lacks antecedent basis.

As to claim 6, line 24, "the surface resistivity" lacks antecedent basis.

As to claim 7, line 19, "the distance" lacks antecedent basis.

As to claim 7, line 24, "the moving speed" lacks antecedent basis.

As to claim 7, line 26, "the surface resistivity" lacks antecedent basis.

Appropriate correction is required.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.

Claims 1-8 are allowed over the prior art of record.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Motohashi, Miyashiro et al., Suzuki et al., and Tanaka et al. (Japan, 953) disclose art in intermediate transfer members.
